Wide standard range

AGA offers the widest refrigerant product line of natural refrigerants and HFC/HFO gases. Our standard range consists the most common refrigerants. In addition to refrigerants we offer other gas related products and services such as equipment and trainings.

New refrigerants launched

AGA is constantly adding new refrigerant gases with low GWP to the product line. During 2018 we increase our range with several refrigerants, for example R454 and R455.

Total control with ACCURA® gas management

For total control over your gas usage we also offer ACCURA gas management. Each gas cylinder from AGA are individually marked and can be traced at all stages. This serves to facilitate and optimise administration and reporting.

Natural refrigerants

Product	GWP	Cylinder size in litres	Content in kg	Item number
R744 Carbon dioxide refrigerant grade 4.0	1	20	15	117960
		40	30	110785
R290 Propane	3	12	5	111649
		79	33	112537
		12	6	111650
R600a Isobutane	3	27	13	113181
		79	33	113154
		12	5	111651
R1270 Propene/Propylene	3	79	33	115670
		26	13,8	107094
		108	57	107095
R717 Ammonia with diptube	0	126	64	116739
		900	475	113233

HFC and HFO refrigerants
